

The REXULTI Savings Card Frequently Asked Questions

 = REXULTI

 = Antidepressant

What is different with the new REXULTI Savings Card?

The REXULTI Savings Card

now covers a generic antidepressant too.

For new and existing REXULTI and generic antidepressant patients:

- \$0 for the first 2 months
- Maximum applied for first 2 months is \$1,300/month (\$2,600 total)
- Pay as little as \$15 per refill
- Maximum applied per refill is \$200/month
- Pay as little as \$15 for 90-day prescriptions
- 1 card/patient in calendar year
- \$0/month for generic antidepressant with maximum applied of \$100/month

Does the REXULTI Savings Card need to be activated?

No, the REXULTI Savings Card is ready to use and requires no activation.

INDICATION: REXULTI is a prescription medicine used to treat:

- Major depressive disorder (MDD): REXULTI is used with antidepressant medicines, when your healthcare provider determines that an antidepressant alone is not enough to treat your depression.

It is not known if REXULTI is safe and effective in people under 18 years of age.

SELECT IMPORTANT SAFETY INFORMATION:

Medicines like REXULTI can raise the risk of death in elderly people who have lost touch with reality (psychosis) due to confusion and memory loss (dementia). REXULTI is not approved for treating patients with dementia-related psychosis.

Antidepressants may increase suicidal thoughts or actions in some children, teenagers, or young adults within the first few months of treatment. Pay close attention to any changes, especially sudden changes, in mood, behaviors, thoughts, or feelings and report such changes to the healthcare provider. This is very important when antidepressant medicine is started or when the dose is changed. REXULTI is approved only for adults 18 and over with depression.

When does the REXULTI Savings Card expire?

There is no expiration date for the REXULTI Savings Card and no current plans to discontinue this offer. Otsuka America Pharmaceutical, Inc. has the right to rescind, revoke, or amend this program at any time without notice.

Are there any restrictions by insurance and/or pharmacy?

Patients may be eligible for the Savings Card Offer if they have commercial prescription insurance and are 18-64 years of age. Full eligibility will be determined by their pharmacist. For reference, REXULTI is covered on 97% of commercial insurance plans nationwide. Most pharmacies accept savings cards. In the rare instance where a pharmacy does not allow for co-pay card use, a patient can request reimbursement by downloading a form from rexulti.com/mailorder.

If a patient's insurance changes, can they still use their REXULTI Savings Card?

As long as the new insurance covers REXULTI and/or the generic antidepressant and is not Medicare or Medicaid (including managed Medicaid), Medigap, VA, DOD, or TRICARE, or another federally or state funded program that covers their prescription in whole or in part; and this offer is consistent with their insurance, they should be able to use the REXULTI Savings Card.

What if the patient has a deductible vs a co-pay?

If REXULTI® (brexpiprazole) and/or the generic antidepressant is covered by the patient's insurance, both the patient's out-of-pocket and co-pay card benefit will count towards their deductible.

For the first 2 uses, patients pay \$0 for REXULTI with a maximum benefit of \$1,300 per use—\$2,600 that may be applied to an annual deductible.

For uses 3+, patients may pay as little as \$15 for REXULTI with a maximum benefit of \$200 per use. That is an additional \$200 per month that may be applied to an annual deductible.

For the generic antidepressant, patients may pay \$0 per use with a maximum benefit of \$100.

Up to \$5,800 may be applied to an annual deductible with 12 uses. If a patient's deductible has already been met, a patient's expected out-of-pocket cost still operates as outlined above.

Do patients need to acquire both medications from the same pharmacy?

No, but patients will need to present the same card for use at both pharmacies and ask the pharmacist to retain the card information on file. Once the card information is on file for both prescriptions, they should not need to bring it each time they fill a prescription.

What if they are on a branded antidepressant instead of a generic?

The REXULTI Savings Card does not cover branded antidepressants.

What if they are on more than 1 generic antidepressant?

The REXULTI Savings Card will cover 1 generic antidepressant in a 30-day period.

What generic antidepressants will the REXULTI Savings Card cover?

The REXULTI Savings Card covers currently available generic antidepressants. Please see [REXULTI.com](https://www.rexulti.com) for a list of covered generic antidepressants.

SELECT IMPORTANT SAFETY INFORMATION:

Do not take REXULTI if you are allergic to brexpiprazole or any of the ingredients in REXULTI. Allergic reactions have included rash, facial swelling, hives and itching, and anaphylaxis, which may include difficulty breathing, tightness in the chest, and swelling of the mouth, face, lips, or tongue.

Can patients use the card for the antidepressant alone?

The benefits for REXULTI and the generic antidepressant are separate. The generic antidepressant can be written within 3 months before and after treatment with REXULTI.

- Those patients can still receive their separate benefits for both prescriptions within that proximate time frame.

Can patients still use the card for their generic antidepressant if they stop taking REXULTI?

The benefits for REXULTI and the generic antidepressant are separate. The generic antidepressant can be written within 3 months before and after treatment with REXULTI.

- Those patients can still receive their separate benefits for both prescriptions within that proximate timeframe.

Does the REXULTI Savings Card work for 90-day prescriptions?

Yes, patients should confirm with their insurance providers. If allowed, patients pay as little as \$15 per 90-day prescriptions for REXULTI and \$0 for the generic antidepressant.

What if a patient is already taking REXULTI?

An eligible, existing REXULTI patient can still use the REXULTI Savings Card for REXULTI refills and generic antidepressant prescriptions. Patients should present the card to the pharmacist when picking up their prescription(s) and ask the pharmacist to keep the card information on file. The \$0 for 2 months offer is only valid for 1 use in a calendar year. If an existing REXULTI patient used a previous REXULTI Savings Card in the same calendar year, they will still be eligible to pay as little as \$15 per refill for REXULTI and \$0 for a generic antidepressant.

Does the REXULTI Savings Card apply to all doses?

Yes, the REXULTI Savings Card applies to all doses of REXULTI.

INDICATION and IMPORTANT SAFETY INFORMATION for REXULTI® (brexpiprazole)

INDICATION: REXULTI is a prescription medicine used to treat:

- Major depressive disorder (MDD): REXULTI is used with antidepressant medicines, when your healthcare provider determines that an antidepressant alone is not enough to treat your depression.

It is not known if REXULTI is safe and effective in people under 18 years of age.

IMPORTANT SAFETY INFORMATION:

Increased risk of death in elderly people with dementia-related psychosis. Medicines like REXULTI can raise the risk of death in elderly who have lost touch with reality (psychosis) due to confusion and memory loss (dementia). REXULTI is not approved for the treatment of patients with dementia-related psychosis.

Antidepressant medicines may increase suicidal thoughts or actions in some children, teenagers, or young adults within the first few months of treatment. Depression and other serious mental illnesses are the most important causes of suicidal thoughts or actions. Some people may have a particularly high risk of having suicidal thoughts or actions. Patients on antidepressants and their families or caregivers should watch for new or worsening depression symptoms, especially sudden changes in mood, behaviors, thoughts, or feelings. This is very important when an antidepressant medicine is started or when the dose is changed. Report any changes in these symptoms immediately to the doctor. REXULTI is not approved for the treatment of people younger than 18 years of age.

Do not take REXULTI if you are allergic to brexpiprazole or any of the ingredients in REXULTI. Allergic reactions have included rash, facial swelling, hives and itching, and anaphylaxis, which may include difficulty breathing, tightness in the chest, and swelling of the mouth, face, lips, or tongue.

REXULTI may cause serious side effects, including:

- **Stroke in elderly people (cerebrovascular problems) that can lead to death.**
- **Neuroleptic Malignant Syndrome (NMS):** Tell your healthcare provider right away if you have **some or all** of the following symptoms: high fever, stiff muscles, confusion, sweating, changes in pulse, heart rate, and blood pressure. These may be symptoms of a rare and serious condition that can lead to death. Call your healthcare provider right away if you have any of these symptoms.
- **Uncontrolled body movements (tardive dyskinesia).** REXULTI may cause movements that you cannot control in your face, tongue or other body parts. Tardive dyskinesia may not go away, even if you stop taking REXULTI. Tardive dyskinesia may also start after you stop taking REXULTI.
- **Problems with your metabolism such as:**
 - **high blood sugar (hyperglycemia):** Increases in blood sugar can happen in some people who take REXULTI. Extremely high blood sugar can lead to coma or death. If you have diabetes or risk factors for diabetes (such as being overweight or having a family history of diabetes), your healthcare provider should check your blood sugar before you start taking REXULTI and during your treatment.

Call your healthcare provider if you have any of these symptoms of high blood sugar while taking REXULTI:

- feel very thirsty
- feel very hungry
- feel sick to your stomach
- feel weak or tired
- need to urinate more than usual
- feel confused, or your breath smells fruity
- **increased fat levels (cholesterol and triglycerides) in your blood.**
- **weight gain.** You and your healthcare provider should check your weight regularly.
- **Unusual urges.** Some people taking REXULTI have had unusual urges, such as gambling, binge eating or eating that you cannot control (compulsive), compulsive shopping and sexual urges.
If you or your family members notice that you are having unusual urges or behaviors, talk to your healthcare provider.
- **Low white blood cell count**
- **Decreased blood pressure (orthostatic hypotension).** You may feel lightheaded or faint when you rise too quickly from a sitting or lying position.
- **Seizures** (convulsions)
- **Difficulty swallowing that can cause food or liquid to get into your lungs.**

(continued on next page)

IMPORTANT SAFETY INFORMATION for REXULTI® (brexpiprazole) (continued)

Do not drive a car, operate machinery, or do other dangerous activities until you know how REXULTI affects you. REXULTI may make you feel drowsy.

Before taking REXULTI, tell your healthcare provider if you:

- have diabetes or high blood sugar or a family history of diabetes or high blood sugar. Your healthcare provider should check your blood sugar before you start REXULTI and during your treatment.
- have high levels of cholesterol, triglycerides, LDL-cholesterol, or low levels of HDL cholesterol
- have or had seizures (convulsions)
- have or had low or high blood pressure
- have or had heart problems or a stroke
- **Problems controlling your body temperature so that you feel too warm.** Avoid getting over-heated or dehydrated while taking REXULTI.
 - **Do not** over-exercise.
 - Stay out of the sun. **Do not** wear too much or heavy clothing.
 - In hot weather, stay inside in a cool place if possible.
 - Drink plenty of water.
- have or had a low white blood cell count
- are pregnant or plan to become pregnant. It is not known if REXULTI® (brexpiprazole) may harm your unborn baby. Using REXULTI in the last trimester of pregnancy may cause muscle movement problems, medicine withdrawal symptoms, or both of these in your newborn.
 - If you become pregnant while taking REXULTI, talk to your healthcare provider about registering with the National Pregnancy Registry for Atypical Antipsychotics. You can register by calling 1-866-961-2388 or visit <http://womensmentalhealth.org/clinical-and-research-programs/pregnancyregistry/>
- are breastfeeding or plan to breastfeed. It is not known if REXULTI passes into your breast milk. You and your healthcare provider should decide if you will take REXULTI or breastfeed.

Tell your healthcare provider about all the medicines you take

or recently have taken, including prescription medicines, over-the-counter medicines, vitamins and herbal supplements.

REXULTI and other medicines may affect each other causing possible serious side effects. REXULTI may affect the way other medicines work, and other medicines may affect how REXULTI works.

Your healthcare provider can tell you if it is safe to take REXULTI with your other medicines. **Do not** start or stop any medicines while taking REXULTI without talking to your healthcare provider first.

The **most common side effects** of REXULTI include weight gain and an inner sense of restlessness such as feeling like you need to move.

Tell your healthcare provider if you experience abnormal muscle spasms or contractions, which may be a sign of a condition called dystonia.

These are not all the possible side effects of REXULTI. For more information, ask your healthcare provider or pharmacist. Call your doctor for medical advice about your health or medicines, including side effects.

You are encouraged to report side effects of REXULTI (brexpiprazole). Please contact Otsuka America Pharmaceutical, Inc. at 1-800-438-9927 or FDA at 1-800-FDA-1088

(www.fda.gov/medwatch).

Please read **FULL PRESCRIBING INFORMATION**, including **BOXED WARNING**, and **MEDICATION GUIDE**.
